SIXTH DIGITAL TRANSFORMATION CONFERENCE

CALL FOR PAPERS

THE EMERGING ROLE OF GENERATIVE ARTIFICIAL INTELLIGENCE IN BUSINESS

University of Naples Federico II
Complesso Ss. Marcellino e Festo
Largo S. Marcellino – 80138 Naples

8th and 9th February 2024

Submission deadline: 15th December 2023

Email your contribution to: digitaltran@lumsa.it

Organizing Committee

Cristina Mele, University of Naples Federico II
Tiziana Russo Spena, University of Naples Federico II
Marco Tregua, University of Naples Federico II
Giovanni Battista Dagnino, University of Rome LUMSA

Scientific Committee

Tindara Abbate, University of Messina
Paolo Aversa, King's College Business School, London
Francesco Bifulco, University of Naples Federico II
Danilo Brozović, University of Skövde
Francesca Cabiddu, University of Cagliari
Sandro Castaldo, Bocconi University
Maria Colurcio, University Magna Græcia of Catanzaro
Daniela Corsaro, IULM Milan
Alessandra De Chiara, University Orientale of Naples
Stefano Denicolai, University of Pavia
Alberto Di Minin, Sant'Anna School of Advanced Studies Pisa
Claudio Giachetti, University of Bologna
Angelo Di Gregorio, University of Milano Bicocca
Laura Michelini, University of Rome LUMSA
Olimpia Meglio, University of Naples Federico II
Arabella Mocciano Li Destri, University of Palermo

AIDEA

Michele Pizzo, University of Campania Vanvitelli
Alberto Pastore, Sapienza University of Rome
Francesco Polese, University of Salerno
Riccardo Resciniti, University of Sannio at Benevento
Paavo Ritala, Lappeenranta University of Technology
Roberta Sebastiani, Catholic University of Milan
Antonella Zucchella, University of Pavia

Premise

We kindly invite scholars from various research domains (e.g., strategy, entrepreneurship, innovation and technology management, organizational behavior, managerial engineering, supply chain management, distribution, and marketing) to submit their research proposals. The event is designed to foster the development of a multidisciplinary experience.

Conference Theme

Artificial intelligence (AI) has already become much more than a buzzword since it has started permeating profoundly all business activities as well as management scholarly debate. Notwithstanding that, whether Generative Artificial Intelligence (GAI) has reached the same status or will do so in the future is yet to be determined. Potential of GAI tools have recently been stressed by some scholars (Kunz & Wirtz, 2023; Peres et al., 2023) and, most of them, spotted GAI effects in several business domains, calling for further research (e.g., Dwivedi et al., 2023; Fui-Hoon Nah et al., 2023) especially as soon as empirical evidence will be available. Google pinpointed such potentialities by recalling decades of research behind the current status of GAI and highlighted several future expected outcomes, including new ways of interacting, new experiences, and a long wave of investments. Thus, besides content generation that is the obvious operationalization of GAI implementation, most remain to be studied, said and the implications are far from being evident.

In detail, scholars who have started dealing with GAI identified the management areas that might be interested by relevant changes thereby drawing new research directions. In such vein, Kumar et al. (2019) identified new approaches to create offerings, communicate them, and deliver offerings in a perspective framed as personalized engagement marketing; such a view on marketing was both fed and widened by Kunz & Wirtz (2023) highlighting the responsibility issues related on using AI, while Peres et al. (2023) observed multiple effects in conducting research, teaching, and putting into practice firms' strategic, marketing and operations activities. Effects are expected as concerns specific industries (e.g., hospitality as in Dwivedi et al., 2023) or business issues (e.g., human resource management (Budhwar et al., 2023). An all-embracing view on the expected outcomes is advanced by Huang et al. (2019), who pointed at the implications on management as a whole; i.e., as regards corporate stakeholders and corporate activism. Such effects are yet to be unveiled. As such, this workshop call for papers addresses the understanding of what is next in the implementation of GAI in business domains; key attention will be devoted to the following topics, without limiting the authors' interest in other relevant areas:

- Human-AI competition, collaboration and coopetition: challenges and threats for managers consultants and entrepreneurs;
- Firm strategic decision-making processes and the expected contribution of GAI;

AIDEA

- Firm-consumer relationships: AI-generated answers vs the Feeling economy;
- Content generation through GAI;
- GAI as a facilitators for personalized engagement marketing;
- The role of GAI in developing platform ecosystems;
- GAI in entrepreneurial developing and in creating and spotting new opportunities or reinvigorating old ones;
- GAI and firm and ecosystems internationalization;
- Workforce: adaptation, upgrade, U-turn, what to expect?
- Responsibility: blaming the companies or the software?
- GAI's role and conducting research in management and marketing: new emerging methods, new mechanisms and new theories?
- GAI and management and marketing teaching: bright and dark sides.

Publication opportunities and Awards

- The Organizing Committee is working to announce Special Issues of international journals as hosts of selected papers presented in the Naples workshop. News will be announced in due time and full details will be provided during the event.
- Three selected contributions will likely be invited for publication in the magazine *Wired*. The goal is to give visibility, outside of the scientific community, to the best outcomes of the conference with managerial flavor.
- A best paper award will be granted by a committee of both scholars and practitioners. A Conference Best Paper Award will be awarded during the event.

Venue and hospitality

The conference will take place at the Complesso Ss. Marcellino e Festo (Largo S. Marcellino, 80138 Napoli) - University of Naples Federico II, Naples, Italy.

A list of accommodations offering special rates will be available on the conference webpage.

Roadmap and deadlines

Steps	Date/Deadlines	Details
Papers and abstracts submission	15th December, 2023	<p>Contributions must be sent to this email account: digitaltran@lumsa.it</p> <p>Both full papers (in the range of 6,000-10,000 words) and extended abstract (in the range of 3,000-3,500 words) are welcomed. Full articles only are eligible for the Best Paper Award.</p> <p>The following submission guidelines apply:</p> <ul style="list-style-type: none"> - A Cover page with Authors' details and details of the Corresponding Author; - Both full papers and extended abstracts should include: Abstract, Introduction, Theoretical framework, Methodology, Results/Findings, Discussion, Managerial contribution, and Conclusions; - References in APA style - Files should have either the .pdf or the .doc extension
